zero emissions**

DISCOVER THE SILENCE

S04 Nanocar

SILENCE 

Electric Nanocar with removable battery

The S04 Nanocar can be driven with two removable 'click-and-go' portable batteries, with their own integrated carry handle and trolley wheels. Great for easy charging and enhanced security. All Silence vehicles use the same trolley type battery, interchangeable with each other.

Standard S04 Nanocar features

We present the S04 Nanocar, the Silence way of having a car: 100% electric and adapted for the city. Technology and compact size come together to create the first nanocar, a fully connected four-wheel electric vehicle accessible to all.

- > Top speed 54mph
- > 92 mile range
- > 0-30 in 7 seconds
- > 14kWh (22kW Peak power)
- > Multifunction steering wheel
- > Heating and air conditioning
- > Electric windows
- > Audio system and Bluetooth
- > My Silence App connected
- > Removable battery
- > Charge in any UK standard 240V socket
- > Running costs of around £0.01 per mile
- > 2 Years Vehicle Warranty
- > 3 Years Battery Warranty

Reduce your footprint

Thanks to its small size, the S04 can be parked almost anywhere.

Compact and functional

The most compact micro car (2282 x 1268 x 1573 mm) and with the most trunk capacity (247L) in its category.

Optimised and functional space

Seats arranged in a staggered manner, generating a feeling of space and giving freedom of movement.

Keyless, always connected

100% connected, access your S04 without the need for a key, control it 100% via the my Silence App; turn it off, share it and more.

Available on Google Play and the App Store.

More than a battery. We redefine portable energy!

Unique removable trolley-type batteries

Fast & Easy Extraction System: the easiest and most convenient way to transport a battery... Yes, like a trolley! Recharge your Battery Pack at home or the office. High-capacity battery, 5.6 kWh, for outstanding performance.

Energy wherever you want with Nomad

Our batteries are sources of energy, not only for our vehicles, but for anything we set our minds to. From this idea, the Nomad is born. A portable inverter that you can take wherever you need and use together with your battery as a power source.
