Features

Driving modes

Eco

In Eco mode, the scooter's speed is limited to **43mph**. This allows you to save money and relax more as you drive.

City

The S01 is designed for getting around the City, with the speed limited to **53mph**, giving the vehicle a good performance level and more balanced power consumption.

Sport

In Sport mode, you can drive at speeds of up to **62mph**, providing increased power and speed in specific cases and more regenerative braking.

CBS and Regenerative Brake

The S01 is equipped with a combined braking system (CBS): the one on the left applies the brakes on both wheels while the one on the right applies the brake on the front wheel and engages the regenerative brake, which assists braking and also recharges the battery.

Reverse gear

Silence scooters are the only ones to feature a reverse gear, offering full manoeuvrability. This is activated by pressing the green button on the left handlebar. Once you've tried it, it becomes an essential driving mode.
