

ELECTRIC PERFORMANCE MEETS ELECTRIFYING STYLE: THE NEW SILENCE S01+

SOLIHULL, West Midlands 20th June 2022: Silence UK has combined its electric performance with electrifying style, with the addition of the new range-topping S01+ model to its e-moto scooter range.

Based on the S01 Connected and with performance equivalent to a 125cc motorbike, the S01+ is priced at £6,795 OTR and features a 5.6 kWh and 7.5kW motor, reaching 30mph in just 3.9 seconds and on to a limited top speed of 62mph.

For added response when you need it, S01 + offers a faster acceleration in Sport mode and features an innovative “push-to-pass” overtaking mode, which briefly increases the limited top speed to 68mph.

To suit its performance aesthetic, S01+ augments the comprehensive S01 Connected specification, with adjustable suspension, Galfer ventilated brake discs and a suite of sporty design cues, including a contrast texture seat, red detailing and Anthracite grey paint.

Connectivity comes through the dedicated Silence app, for Apple and Android devices, which allows control of important settings, such as checking charge status and activating remote lock/ unlock, as well as route planning through embedded Google Maps.

Tony Lewis, co-founder of Silence UK, said: “Silence is a stylish and practical alternative to combustion bikes, whether you’re an individual, or business user. Now with S01+, we’re adding extra sports style, for those who want their Silence to stand out from the crowd. Production of the S01+ is available in limited numbers so it’s very much first come first served!”

The S01+ is the sixth model in a growing Silence plug-in range which offers all-electric two-wheel options, to suit any budget or need.

Private riders and commuters will be drawn to the stylish S01 and new Urban spec, available in both S01 and S02 trim. For professional riders and fleets, the S02 Business and S02 Business+ make the perfect work partners, with long-range battery options and a large collection of practical accessories.

All feature Silence's patented 'click and go' removable and portable Silence lithium-ion battery, which can be charged through any 240V socket and can reduce running costs to a penny per mile – a massive 80% less than ICE-powered scooters.

Every Silence e-moto scooter comes with a comprehensive manufacturer's warranty of two years for the e-moto scooter and three years for the battery, plus two years' AA UK roadside assistance cover.

About Silence:

First established in Barcelona in 2012, Silence has an excellent reputation, forged by its founding team of experts and enthusiasts, who developed in-house their own all-electric scooter, from the ground up. Their mission was to accelerate the change towards sustainable urban mobility with innovative technology. Their proprietary battery tech and smartphone app have since made Silence a byword for simple and smart urban travel.

Today, Silence's 165-strong team produce almost 10,000 scooters per year in their Barcelona assembly plant. Silence is the only manufacturer of electric motorcycles in Spain and the only one to design and manufacture its own batteries and BMS (Battery Management System). Silence is also the biggest specialist EV manufacturer in Europe. .

Silence UK was formed in late 2020 by four Warwickshire-based automotive and business experts to bring the established Silence e-moto scooters to UK customers and is headquartered at its first flagship store in Solihull, West Midlands.
